Our heritage of designing jewellery, allows us to design something that will stay with you now and generation into the future. For heavy soil, warm soapy water may be used providing the watch is water resistant and is dried properly following the cleaning process. Extremes of temperature may damage the battery or movement. Hard surfaces can scratch the watch. Michael Hill watches water resistance is indicated at the back of the watch face. It is not recommended to wear your watch in heated water such as showers or hot tubs. Do not operate the crown or push buttons under water or while the watch is wet. If the watch features a screw down crown, ensure it is tightened before submersing in water.

If the watch is used in seawater, be sure to rinse it thoroughly with clean fresh water to remove all traces of salt. Never store a wet watch in a closed container. Any sign of moisture inside the case requires the watch to be taken to a Michael Hill store for service. Seals and other water resistant parts should be replaced every 2 years during regular maintenance to ensure ongoing water resistance. Sudden changes in temperature might let moisture into the watch. You can do that by referring to the manual relevant to your watch see 4digit code on the back of the watch. You may need to do this when you first wear the watch. Otherwise, most often the issue will be as a result of needing a new battery. You can take your watch to your local Michael Hill store, or to any watch servicing location where there will be a small fee for battery replacement. Don't forget to request the pressure test so it remains water tight. In some cases, after a battery replacement, your watch should be tested for water resistance pressure test. Ask your local store if the test is needed. It is recommended to regularly remove sweat, dust and dirt from the case, bracelet or strap with a soft dry cloth. Dirt on the case or bracelet will cause increased wear on the pins and joints and can trap salt causing corrosion. It should be removed with a soft brush. For heavy soil, warm soapy water may be used providing the watch is water resistant and is dried properly following the cleaning process. The bracelet can be cleaned using a new toothbrush not used; they have abrasives embedded in them and warm soapy water. Rinse with clean water and dry completely. This should not be done if the watch has not been water tested recently. Instead, bring it in to a Michael Hill service center for cleaning. Water blasters or solvents will damage your watch. It is not recommended to use them. Do not polish your gold tone watch with jewellery or metal polish. Visit our store locator for contact details.

<http://www.drupalitalia.org/node/79743>

Damage caused by accidents or mistreatment is not covered. Remember your watch is a delicate instrument and although it does have some protection against shocks and knocks, it is not

indestructible. Dropping a watch onto a hard surface or knocking can damage the movement, the case, glass, or other components. If a watch is rubbed against an abrasive surface such as concrete, stone, glass, or ceramic it is likely to be scratched. Sand embedded in wooden tables, or the porcelain clay in most writing paper will also scratch or abrade the case, bracelet or glass of a watch. Do not polish your gold tone watch with jewellery or metal polish. Please check your watch water resistance against the water-related use table above to see what water conditions your watch can withstand. The water resistance indicated either in METRES or ATM refers to a dry atmospheric pressure test and is not the depth below sea level that the watch has been designed for. When a watch has been in salt water, always rinse with fresh water and dry. Watches with leather bands should ideally not be worn in water as the material will deteriorate over time. If the watch is exposed to chlorinated pools, soaps, salt water, etc the gaskets should be changed on a yearly basis. If a watch has moisture under the glass, keep it dry and bring it to us as soon as possible. Your nearest Michael Hill store can arrange for the moisture to be removed and for the watch to be pressure tested. Fees will be applicable for this service and may include transport charges in some cases. Within this period, regulation, adjustments, repair or replacement of parts will be performed without charge. The warranty does not cover parts or repairs for damage caused by accidents or mistreatment as reasonably determined by Michael Hill in its assessment of the watch.

<http://www.dolciariavarone.com/images/briel-es38-manual.pdf>

You are however entitled to compensation for reasonably foreseeable costs incurred because of the defect, including the cost of returning the watch to us for repair, replacement or return. You are entitled to a replacement or refund for a major failure and for compensation for any reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Where goods are not of acceptable quality, or do not comply with any of the other guarantees set out under the CGA, you are entitled to a remedy from Michael Hill. If the problem is minor and can be fixed, Michael Hill will repair the watch, replace it or provide you with a full refund. If the problem is substantial or cannot be fixed, you are entitled to return the product and ask for a replacement or a refund, or claim compensation for the difference in value. Nothing in this warranty limits your rights as a consumer under applicable law. If upon inspecting the watch is deemed to be defective or not of merchantable quality, Michael Hill will repair or replace it for you, or may offer you a refund. If you need any assistance, you can jump on live chat or contact our Customer Service team. We are working closely with our delivery partners to ensure you safely receive your products. However if you don't, we are still offering our 30 days change of mind returns policy for online orders. All discounts quoted are off the list price for that product.
